GAV

Foresight Solar Fund Limited ("the Company") is a Jersey registered, closed-end investment company investing in a diversified portfolio of ground-based solar PV and battery storage assets in the UK, Australia and Europe.

INVESTMENT OBJECTIVE

- The Company's objective is to provide investors with a sustainable and progressive quarterly dividend. The Company aims to preserve and where possible enhance capital value through the reinvestment of excess cash flows, not required for the payment of dividends.

INVESTMENT COMMENTARY

- As at 30 June 2021, Net Asset Value ("NAV") was £596.4 million, resulting in a NAV per Ordinary Share of 98.0 pence (31 March 2021: 91.9 pence). This is largely attributable to an upward revision in the power price forecasts due to the strengthening of commodity prices and the successful refinancing of one of the Australian assets, Bannerton.
- On 4 May the Company announced the acquisition of a 50% equity stake in Sandridge Battery Storage Limited ("SBSL") for a total investment of up to £12.7 million, including construction costs. SBSL holds the development rights to construct the Sandridge Battery Storage project, a 50MW lithium-ion battery energy storage system. The acquisition marks the Company's first investment into Battery Storage Systems.
- As at 30 June 2021, the Company's portfolio consisted of 59 assets with a net peak installed capacity of 1.019 GW. The portfolio includes four Australian assets representing 146MW, four newly acquired Spanish assets under construction and one battery storage asset representing 25MW in the U.K.

OPERATIONAL AND FINANCIAL UPDATE

- Electricity generation from the UK portfolio for the six months to June was 3.4% above budget, driven by strong asset operational performance and irradiation levels above budget.

DETAILS OF THE FUND
